

Hacktober

2024-09-08

Hacktober

Key Points

- Registration starts in 15 days 17 hours from now so its like 23rd September and the registration ends in October 31st.
- so it basically needs us to make 4 high quality pull or merge in [GitHub](#) or git lab i got what it mean so basically we have to [contribute](#) in their project.
- Additional points discussed below

Pull/Merge Request Details Pull/Merge Request Details

Here's how we validate contributor pull/merge requests ("PR/MRs") for Hacktoberfest

out-of-bounds Your PR/MRs must be within the bounds of Hacktoberfest.

Your PR/MRs must be created between **October 1** and **October 31** (in any time zone, UTC-12 thru UTC+14).

Your PR/MRs must be made to a public, un-archived [repository](#).

Pull/merge requests created before October 1 but merged or marked as ready for review after do not count.

excluded Repositories that go against Hacktoberfest's values will be excluded from qualification and PR/MRs made to those repositories won't count.

- **spam-** Your PR/MRs must not be spammy.
- **participating-** Your PR/MRs must be in a [repository](#) tagged with the "hacktoberfest" topic, or have the "hacktoberfest-accepted" label.
- **invalid-** Your PR/MRs must not be labeled as "invalid".

- **accepted-** Your PR/MRs must be merged, have the “hacktoberfest-accepted” label, or have an overall approving review.

Once your PR/MRs pass all the checks above, it will be accepted for Hacktoberfest after the seven day review period.

so there's a **repository** for hacktoberfest and we need to see the issues to make the merge request or pull request

The **repository** link is \Rightarrow <https://github.com/fineanmol/Annoying-submit-button>

we need to make pull/merge requests according to the issues made and we have to submit 4 high quality merge.

Let ME Know what type of issues you guys would like to work on :

the **issue link** \Rightarrow <https://github.com/fineanmol/Annoying-submit-button/issues>

There are currently 35 open issues we need to start working on any 4
